GLOBAL SALES DATA ANALYTICS

PROBLEM STATEMENT:

This research is aimed at designing and implementing of analysissales system for Online food delivery. It is set of alleviating the problems the company encountered during sales computation in the past. It describes and explain the computerization of sales and how to calculate due cash sold by the cashier and sales person. The project gives a detailed way of calculating the entire sales record of Online food delivery PLC, including their budgeting, sales record, transaction, stock at hand etc. and how the result is stored in the database of the company as well as the system required for the computerization and tabulation of different financial areas of the company. This project is also of great advantages because it helps to analysis sales record and calculation, daily sales of the company, this is done to reduce insecurity of the company fund and sales record, because it is, manually done, the record may be incorrect.
